Benzydamine 0.15% w/v Oromucosal Spray

Read all of this leaflet carefully because it contains important information for you. This medicine is available without prescription. However, you still need to use it carefully to get the best results from it.

1. What Benzydamine Spray is and what it is used for
Benzydamine Spray is used to treat pain and inflammation (redness, swelling, and heat) in the throat or mouth. Benzydamine contains a non-steroidal anti-inflammatory drug (NSAID).

2. Before you use Benzydamine Spray
Do not use Benzydamine Spray
- If you are allergic (hypersensitive) to benzydamine or any of the other ingredients of Benzydamine Spray (see section 6. What Benzydamine Spray contains).
- If you have a history of recurring attacks of angioedema (swelling of the face, hands, and throat), oedema (swelling) of the mouth, or asthma.

3. How to use Benzydamine Spray
- Unless your doctor, dentist or pharmacist tell you otherwise, always use Benzydamine Spray as described in this leaflet.
- Check with your doctor, dentist or pharmacist if you are not sure.

4. Possibility side effects
Like all medicines, Benzydamine Spray can cause side effects, although not everybody gets them.

5. Further information
For more information about the use of this medicine and how to dispose of any remaining medicine, call 1800 004 280.
